Summary

Computer Engineering graduate and software developer focused on practical workflow automation and AI-powered integrations. Builds n8n workflows that connect business tools, APIs, and data sources to reduce repetitive work and improve handoffs. Experienced in lead enrichment, CRM data flows, AI voice workflows, retrieval-augmented generation (RAG), and full-stack web development. Approaches automation through process discovery, explicit business rules, testing, monitoring, and clear documentation.

Education

San Sebastian College–Recoletos de Cavite — Bachelor of Science in Computer Engineering

Computer Engineering — 2020 – 2024

Experience

Yortechne — Remote

Software Developer / Operations Engineer — Jun 2025 – Sep 2026

- Developed and maintained web applications and software features to support business and client requirements.
- Built responsive user interfaces and integrated application features with APIs and data services using skills from a full-stack development background.
- Supported day-to-day software operations by troubleshooting issues, testing changes, and helping maintain reliable application delivery.

Self-employed — Remote

Freelance Web Developer / AI Automation Engineer — 2024 – Present

Build and deliver web applications and AI automation services for business workflows.

- Connect forms, enrichment services, CRMs, and collaboration tools to reduce manual lead processing and follow-up.
- Develop full-stack applications using Next.js and related web technologies.
- Translate workflow needs into documented process steps, integrations, and maintainable handoffs.

RITS IT — Cavite, Philippines

Information Technology Technician — Nov 2024 – Jan 2025

- Resolved 97% of technical support tickets on the first attempt, according to the existing resume record.
- Handled more than 100 user inquiries with a reported 98% satisfaction rating.
- Diagnosed end-user issues and supported reliable day-to-day IT operations.

LZ Cybersecurity — Manila, Philippines

Intern Developer — Apr 2024 – Jun 2024

- Collaborated with the cybersecurity team on a web tool to simplify and standardize client penetration-testing documentation workflows.

Projects

Lead Entry & Enrichment Automation

Built a lead intake workflow that captures submissions with Tally, enriches records using Apify and Firecrawl, and stores them in Airtable. Creates a dedicated Notion page for each lead to support organized research and follow-up.

- Tools: n8n, Tally, Apify, Firecrawl, Airtable, Notion.

AI Voice Receptionist

Connected a voice assistant to business tools for policy lookups and appointment scheduling. Integrated tool calls with calendar, spreadsheet, and email services.

- Tools: Vapi, n8n, Google Calendar, Google Sheets, Gmail.

RAG Vector Database Automation

Automated the process of storing files in a Supabase vector database and retrieving relevant information to answer user queries.

- Tools: n8n, Supabase, PostgreSQL, Google Drive, OpenAI.

Automated Client Onboarding Channels

Connected a ClickUp status change to an n8n workflow that creates internal and client-facing Slack channels for onboarding.

- Tools: ClickUp, n8n, Slack.

Skills

☆ Automation and integration

n8n, workflow orchestration, REST APIs, webhooks, process mapping, error handling, data synchronization

☆ AI workflows

AI agents, OpenAI, RAG, vector databases, prompt and tool integration, human review checkpoints

☆ Automation platforms and services

Clay, Apify, Firecrawl, Tally, Airtable, Notion, Vapi, ClickUp, Slack

☆ Productivity integrations

Google Sheets, Google Calendar, Gmail, Google Drive

☆ Development

JavaScript, TypeScript, Python, React, Next.js, Node.js, HTML, CSS

☆ Data and infrastructure

Supabase, PostgreSQL, MongoDB, Docker, Cloudflare, Firebase

☆ Additional tools

Zapier, Make, GoHighLevel
